Integrated Land-Use Initiatives: Theory and Practice – Part 1

saba | 📅 27 Sep 2023   📅 Assigned By: Admin User

Integrated Land-Use Initiatives: Theory and Practice – Part 1

Integrated land use is a set of best practices that recognizes the interaction between different land uses within a given landscape, such as agriculture, forestry, urban development, and conservation. It involves carefully planning and managing land uses to optimize their socio-economic and environmental benefits while minimizing negative impacts. By integrating different land uses and considering their interdependencies, integrated land use helps to address complex challenges, such as conflicting demands by different sets of groups and unsustainable resource exploitation. It enables decision makers to make informed choices that balance economic development with environmental and social considerations. When employed in the context of sustainable development, integrated land use methods can be used to simultaneously conserve biodiversity, support climate change mitigation and adaptation, promote social inclusion in land-based economic activities, improve food security, and enha… Open Content

Technical Issues and Support for Participants:

If participants have any technical, sign-up or login issues they can contact olcsupport@worldbank.org.

Please do include in your email the following:
• A clear description of the issue you are facing.
• List of steps to replicate the issue.
• OS and browser with version that you are using to access the course where the issue appears; and
• Screenshot of the screen where the issue appears.

These details will help the support team resolve the issue as soon as possible. You can expect to hear back from the support team within 24 hours
